Experienced Senior Frontend Developer with Vue.js, Nuxt.js, React, TypeScript, Next.js, AWS and Node.js. Passionate about coding and helping people in agile teams. Builds clean, modern and scalable user experiences, applications and infrastructures. Watch [my introduction video](#).

MY WORK EXPERIENCE

Sdui GmbH   Berlin, Germany
Senior Frontend Developer   February 2023 - July 2024
- Maintained and improved a Vue.js app, boosted user interaction at least 20% through new editing features.
- Conceptualized and implemented video conference features for a React app, improved user engagement.
- Wrote technical documentation on WebSockets that streamlined onboarding, reducing dev time by 30%.
- Guided junior developers through pair programming, enhancing their front-end skills and productivity.
- Developed a migration guide to help developers transition from Vue 2 to Vue 3 for cross-functional teams.
  [See More](#)

Homeday GmbH   Berlin, Germany
Senior Frontend Developer   March 2020 - January 2023
- Migrated components and pages from PHP to Vue + Nuxt, improved page speeds up to 30%.[*](#)
- Built Infrastructure as Code with AWS and GitHub Actions, reducing costs by 15%.[*use case](#)
- Contributed to frontend systems integrated with backends running on scalable infrastructures.
- Accelerated CI/CDs by 25% through replacing unit tests with integration tests. (with Testing Library, Jest)
- Built, optimized, improved and maintained multiple apps with HTML5, CSS3, Javascript & Typescript, Vue, using BEM CSS, Storybook, Design System, NPM with a team of 30+ people in engineering in agile teams.
- Collaborated with backend and DevOps teams to ensure seamless CI/CD pipelines, blue-green deployments, and monitoring (e.g., using Prometheus, Grafana) to maintain uptime and system health.
- Mentored junior developers, enabling promotions within 8 months.

Turkish Radio Television Corporation (TRT World)   Istanbul, Turkey
Frontend Developer   March 2018 - March 2020
- Optimized rendering performance for landing pages, debounced API interactions, and employed lazy loading and caching to ensure responsiveness even under peak usage, reducing load times by 25%.
- Developed and maintained frontend components that handled real-time user interactions and large volumes of concurrent data transactions, such as dynamic maps for 2018 elections for over 75k+ concurrent users.
- Built app features and Vue, and a REST API with Node.js + Express, accelerated workflows by 50%.
- Developed and optimized a CMS editor, improved UI/UX across the app, reducing content creation time for editors by 30% across the media platform.

1 Startup, 2 Web Agencies, 2 Internships   Istanbul, Turkey
As Frontend Developer or Full Stack Developer   May 2012 - January 2018

SKILLS

Vue, Nuxt.js, TypeScript, React, Next.js, JavaScript, Node.js, Nest.js, WebSockets, PHP, Vite, Figma, Contentful, Stakeholder Management, Rest API, AWS, Cypress, Jest, Webpack, Git, Github, Docker, Postman, HTML, CSS, SCSS, LESS, Bootstrap, Tailwind, Figma, Agile, Scrum, Kanban, BEM, MySQL, Laravel, Symfony, SQL, UI / UX

EDUCATION

Istanbul Arel University   **Istanbul, Turkey**
Associate's Degree in Computer Programming   2017

Inonu Technical High School   **Istanbul, Turkey**
Vocational Training in Information Technologies   2013

CERTIFICATES

Software Design Principles (OOP, UML, SOLID, Design Patterns), Communicating with Emotional Intelligence, Interpersonal Communication, Writing a Tech Resume

DIVERSITY & INCLUSION

During my time at Homeday, I co-led a Diversity and Inclusion Taskforce, where I gained valuable experience in fostering inclusivity and collaboration within the workplace;
- Designed and implemented team-building strategies and OKRs.
- Delivered impactful Unconscious Bias Training, fostering awareness across teams.
- Planned and facilitated workshops, promoting inclusive and collaborative work culture.
